Attention: **Mr. R. Lee**

RE: **STREAMLINE-RESCOM PRODUCT RANGE**

Dear Sir,

This letter is verification that I as a qualified facade engineer have reviewed the Streamline Plus cladding framing system and can qualify that it is an engineered system. The guide tables as provided on the Technical Data Sheet (dated 21 September) provide general design guide tables for the use of this aluminium framing system. The system can be used to secure a variety of cladding products to a building facade.

As each project is different, final structural reviews and compliance are still required for individual projects based on job specific requirements.

Yours Faithfully

Harry Bohler *BEng, MIEAust, CPEng, RPEQ*
